Introduction

This is an annex to the 2016 Profile of children and young people in Royal Greenwich. It includes a range of data for schools and children's centres in Royal Greenwich. Data set out is the most up to date as at profile publication (April 2017).

Royal Greenwich has 24 children's centres across five areas, 4 nursery schools, 63 primary schools, 14 secondary schools, 1 all phase school, 4 special schools and 1 pupil referral unit.

The annex should provide a useful reference guide for schools, children's centres, governors, officers within the Local Authority and partners who want to know about the characteristics and performance of settings within the borough.

Status of the data

Contextual data for schools is mainly based on the January 2016 School Census. One secondary school (International Academy Greenwich) was not open as at January 2016 therefore the tables will only reflect the 13 that were. Similarly the all phase school (St Mary Magdalene) was a primary school as at January 2016 therefore the primary tables include 64 primary schools. In September 2016, the Royal Greenwich University Technical College (UTC) extended its age range to become a secondary school, admitting children into Year 7. The data set out in this profile refers to the period when it was a UTC, hence only years 10 and above shown.

Attainment data for schools is based on final results.

Attendance data for 2015/16 are provisional.

Royal Greenwich no longer receives School Census data for Shooters Hill Post 16 Campus, but some historical data e.g. for exclusions has been included in the tables.

Contextual data for children's centres are based on data recorded in eStart between April 2015 and March 2016.

Some percentage figures do not add up to 100% due to rounding.

Descriptions of conventions used in tables

Grey shading = not applicable

- = not available

Children's Centre and Childcare Data

Families may access childcare and support from a variety of formal and informal sources, and may decide not to take up services at their local children's centre. However, registration at a children's centre and subsequent monitoring of take-up of services provides an opportunity for children's services to confirm that children under five are healthy, safe and receiving appropriate care, even if they do not subsequently attend regularly.

Based on 2015/16 figures, 83% of resident children were registered at a Royal Greenwich children's centre. Registration rates were lowest in East. Reach areas on the borders of the borough tend to have lower take up, as children may attend settings in neighbouring local authorities.

Contact with any centre at least once a year allows a child's wellbeing and the needs of the family to be checked and where necessary to be assessed and support/services identified. Families who are registered with a centre but have not been seen are subject to outreach work which varies in approach. In 2015/16, 73% of resident children were seen at a centre in the borough.

Although children's centres are open to all, centres are challenged to improve registration and attendance for children and carers from vulnerable groups. Vulnerable groups are those which national data suggests will experience the greatest risks to their health, safety, emotional wellbeing and potential for achievement. These groups include children from Black and Minority Ethnic backgrounds, children in workless households, male carers, lone parents, teenage mothers (and pregnant teenagers), and disabled children. Centres are tasked with identifying local priority needs and making sure services are developed to meet them e.g. service families and traveller families.

Disadvantaged 2 year olds receiving a funded early years place

National funding is available to provide childcare places for two year olds who meet certain criteria: if the family is receiving government benefits due to worklessness or low income; if the child is looked after or has been adopted from care; or if the child has high-level special needs or disability. Local funding is also available to provide childcare for two year olds from other families with significant needs (including those who have experienced domestic violence, substance misuse, parental physical or mental illness, siblings with disabilities, children on Child Protection Plans etc.)

Take up in the borough has improved significantly over the past year. We are working with parents and providers to improve awareness of childcare provision for disadvantaged two year olds, and to remove barriers to childcare access.

Take up of 3 and 4 year olds receiving their free early learning entitlement

All 3 and 4 year olds in England can get 570 hours of free early education or childcare per year. This is usually taken as 15 hours each week for 38 weeks of the year. While some parents may choose alternative childcare options, take-up of funded early years education indicates that children are attending structured provision which is subject to the Ofsted inspection framework, where any additional needs or risks can be properly assessed.

Table 76 Percentage of RBG registered children seen at a local centre between April 2015 and March 2016 (seen means attended any activity at a children's centre)
