LOCATION	33 PARKGATE, BLACKHEATH, LONDON, SE3 9XF		
PROPOSAL	Ash (T1) - fell Tree is showing signs of dieback in the canopy - poor specimen and it is felt that although a crown reduction will help keep green cover it will not be a good long term solution. Removal will improve light and water conditions in the owner and neighbours property. A native species will be planted as a replacement. Yew (T2) - fell Major landscaping and planting will take place and as this is a relatively young tree with low amenity value. There will be a number of native species and pollinator friendly trees & shrubs planted as a replacement. Yew (T3) - Reduce height by 1m from 8m to 7m. Reduce lateral spread by 1m from 8m to 7m. Reduction to shape canopy, to suitable points and maintaining natural aesthetic. Work undertaken to bring back to form and improve light conditions for both owner and neighboring properties. Tree has been reduced previously so work is part of an ongoing maintenance cycle. The pruning will not go beyond any previous points and sufficient time has elapsed to allow canopy regrowth.
